RRP: £15.29 inc. VAT

ANTHRACITE GREY

STONE GREY

CHOCOLATE BROWN

CHARCOAL

Commercial Grade - CompoDeck 150mm wide composite decking boards are a commercial grade heavy duty decking board. Unlike domestic grade WPC which has a cheap high wood pulp content, CompoDeck is produced with a higher resin and polypropylene percentage, including additional UV anti-fade agents. This produces a much harder and longer lasting composite material.

Anti-Slip - CompoDeck is manufactured with two different anti-slip sides. Both sides are grooved with added micro abrasions to produce a decking surface that even when wet is highly anti-slip. CompoDeck can therefore be safely enjoyed all year round in all weathers.

Low Maintenance - When installed correctly CompoDeck requires virtually no maintenance. The decking will not require yearly sealing, varnishing or treating like timber decking. Designed with self cleaning, anti-fade and rot resistant properties, CompoDeck requires little to no maintenance.

Pet & Child Friendly - Harmful treatments and chemicals used to treat and maintain wood decking are not required with CompoDeck. Also the surface will not splinter so pets and children can play safely all year round.

Full Bodied Colour - CompoDeck is available in four attractive colours. Because the colour runs all the way through any scratches or damage will be virtually unnoticeable and if needed can be sanded out.
